Schulte Building Systems introduces its new line of Bolt-Up Structures,

DIAMONDBACK BUILDINGS

The DIAMONDBACK BUILDING is designed not only to be versatile but economical as well. The entire structure is assembled using bolts and screws, with no welding required. Available for delivery to you in only four weeks from the time the order is placed. This simple design allows for quick and easy erection. **All primary and secondary members are constructed of pre-galvanized steel.** Cold formed, designed and manufactured by Schulte Building Systems using the **International Building Code (IBC) 2003, with a 110 mph wind load and a 3:12 roof pitch.**

Items included in the base price are:

- One 12' x 10' Framed Opening in the end wall for 12' Eave Heights
- One 12' x 12' Framed Opening in the end wall for 14' Eave Heights
- 26 Gauge Colored U Panel Walls with a 25 Year Limited Paint Warranty
- 26 Gauge Galvalume® Roof with a 20 Year Limited Warranty
- Simple Eave Trim
- Anchor Bolt Plans and Erection Drawings

Optional Items: (to be field located only)

- 26 Gauge Colored Roof with a 25 Year Limited Paint Warranty
- Walk Doors
- Windows
